

Ninad Yedurkar

PROFILE

Ninad is an inquisitive individual who is looking, every day, to learn something new. He is guided in his life by his passions and is very uncomfortable with the the comfortable. In fact, he thrives working on the unknowns amongst uncertainties. While he is extremely confident in his own intellect and indefatigable spirit, he respects importance of every role in a team. He is proud of the fact that he has got along very well with almost every member of each team that he has ever worked for.

EXPOSURE

Ninad is an Instrumentation Engineering graduate who followed it up with an MBA in Finance from the renowned NMIMS, Mumbai. He firmed up his understanding of management skills in the professional environment working with Citigroup in Mumbai as well as in London. After working with Citibank UK for about 4 years, he returned to India to fulfil his entrepreneurial urges.

The constant need to challenge himself has resulted in Ninad successfully dwelling in quite a few entrepreneurship opportunities in diverse fields.

FOUNDER, ACEGRADS

LEARNING CENTRE FOR POST-GRADUATION STUDIES

Trained over 15000 students from villages, small city centres and grade B and C cities in and around Kolhapur, Sangli, Solapur and Satara districts to get into quality post-graduate courses and top companies of the world.

FOUNDER, PRAJWALBHARAT

LED STREET LIGHTING SOLUTIONS

Incubated in Wharton Business School, Prajwalbharat is one of the pioneers in bringing energy efficient LED solutions to government owned street lighting systems in Maharashtra. Helped significantly improve adoption of LED technology by creating an umbrella of all street lighting services starting from manufacturing of lights, marketing of the products across all government local bodies to installation of lights and maintaining them. Installed LED street lights for 534 local bodies - grampanchayats and municipal corporations - across 18 districts in Maharashtra.

FOUNDER, FUTURE INFINITE

GUIDANCE SYSTEM ENCOMPASSING PERSONAL LIFE & SOCIAL ENGAGEMENT

If qualities in a child can be identified during an early age of 7-14; they get enough time to enhance on the positives and flourish in their own interest areas. If Parents as well as children are guided to make the right choice at appropriate stage and age, they get to conceive a plan to excel their child in a particular area of interest. Since, young children become too conscious if they are asked questions in a test format, the objective of Future Infinite is to interact with them using game methodology and inform the parents about which hobbies and activities the child would benefit by getting involved in.

FOUNDER, AON AQUACULTURE

BIO-FLOC FISH PRODUCTION IN POLLUTION-FREE & CHEMICAL-FREE WATER

To meet future challenges in food production, Bio-floc aquaculture system is used as an innovative and cost-effective technology which produce more by reducing dependence and exploitation of natural resources like water and land. Toxic materials to the fish and shellfish such as Nitrate, Nitrite, Ammonia are converted to useful product, *ie.*, proteinaceous feed.

In addition to running his own businesses, Ninad is helping **TBI CORN LTD** navigate the path of better financial management as the **CFO**. TBICL is poised to take the leap towards phenomenal growth on the back of excellent sales pipeline and overcoming the obstacle of working capital bottlenecks is right now his primary focus.
