We are an innovation driven enterprise and to produce new products which attracts higher cost. Thus, the cost of the new product is comparatively higher than the usual product. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these

suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

5. We will continue to be controlled by our Promoters and certain related entities after the completion of the Issue.

Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair the malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same. Further, we may also be exposed to public liability from the end consumer for defects in the quality of the products stored in our premises.

15. If we are unable to maintain and enhance our brand and reputation, the sales of our products may suffer which would have a material adverse effect on our business operations.

Our business depends significantly on the strength of our brand and reputation in marketing and selling our products. We also believe that maintaining and enhancing the "TBI" brand, are critical to maintaining and expanding our customer base. We believe that continuing to develop awareness of our brand, through focused

and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers' confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

16. We are dependent on third party transportation providers for delivery of trading goods and materials to us from our suppliers and delivery of trading goods and materials to our clients. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

As Manufacturing is our main activities, our success depends on the smooth supply and transportation of the materials and transportation of our trading materials from our suppliers to us/ or our buyers/clients, both of which are subject to various uncertainties and risks. In addition, materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of materials to us as well as to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

17. Failure to manage our stocks could have an adverse effect on our net sales, profitability, cash flow and liquidity.

All the products that we manufacture are for human consumption and are subject to risks such as contamination, adulteration and product tampering during their manufacture, transport or storage. Our raw materials and our products are required to be stored, handled and transported at specific temperatures and under certain food safety conditions. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

18. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us, hiding unauthorized or unsuccessful trading activities from us or the improper use of confidential information. Such misconduct could result in unexpected business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

19. A shortage or non-availability of electricity may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.

Our manufacturing operations require a significant amount and continuous supply of electricity, and any shortage or non-availability may adversely affect our operations. The production process of certain products, as well as the storage of our products at particular temperatures requires significant power. We currently depend on state electricity supply for our energy requirements. Any failure on our part to obtain alternate sources of electricity in a timely manner and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

20. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition.

We have experienced considerable growth over the past years and we have significantly expanded our operations and product portfolio. Our Company has recorded net profit after tax of ₹ 666.75 Lakhs and ₹ 623.33 Lakhs from 30th September, 2023 and 31st March, 2023 respectively. We cannot assure you that our growth strategy will continue to be successful or that we will be able to continue to expand further, or at the same rate.

Our inability to manage our expansion effectively and execute our growth strategy in a timely manner, or within budget estimates or our inability to meet the expectations of our customers and other stakeholders could have an adverse effect on our business, results of operations and financial condition.

21. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations

We may require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business including Food Safety and Standards Act, 2006, environmental approvals, factory license, labour related and tax related approvals, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled “KEY INDUSTRY REGULATIONS” and “GOVERNMENT AND OTHER APPROVALS” at pages 117 and 173 respectively of this Draft Red Herring Prospectus.

22. Dependence on debt and outflow of finance cost leads to outflow of cash flows and reduce overall profitability.

Due to manufacturing activities, our business requires significant working capital. We depend on internal accrual, creditors and borrowed fund to meet our finance for working capital. We may also be required to depend on the additional borrowed capital to fund the working capital in future with increase in volume of operations and production. The additional borrowed fund may require us to dedicate a substantial portion of our cash flow from operations to payments of interests, thereby reducing the availability of our cash flow to fund capital expenditures and other general corporate expenditures. It limits our borrowing ability and places us at a competitive disadvantage relative to competitors that have less debt or greater financial resources. There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, we may need to refinance some or all of our indebtedness.

23. We participate and operate in competitive markets with low barriers to entry which may increase competition and have a material adverse effect on our business, financial condition and results of operations.

We operate in highly competitive market segments that are highly fragmented among several market participants. In the food product segment, we compete with numerous multinational and Indian companies with sizeable market shares as well as the broader industry comprising numerous small competitors. We also believe that free information available on internet about manufacturing food items may also pose a competitive risk. Moreover, barriers to entry for the market segments in which we operate are generally low as the investment cost is very high. We anticipate these low barriers to entry, combined with forecast growth potential in the food industry, will lead to increased competition both from established players as well as from new entrants in the industry. This could include attrition of our staff to our competitors or our staff establishing competitive enterprises.

24. Risk associated with orders not having been placed for plant and machinery in relation to the objects of the issue, indicating the percentage and value terms of the plant and machinery for which orders are yet to be placed.

Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed final orders for all the machineries, equipment's and utilities aggregating to ₹ 1,680.00 Lakhs which is approximately [●]% of the Issue Proceeds are proposed to be acquired for our expansion plan by utilization of Issue Proceeds. Our Company is further subject to risks on account of inflation in the price of plant and machinery. Since the funding for the plant and machinery is from the IPO proceeds, any delay in access to IPO proceeds may eventually delay the process of placing the orders. The purchase of machineries and equipment's would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier's end in providing timely delivery of these machineries, equipment's and utilities, which in turn may delay the implementation of our expansion plan. Further, the quotations relied upon by us in arriving at the total cost of machineries, equipment's and utilities are valid for a specific period of time and may lapse after the expiry of the specific period. Consequent upon which, there could be a possible escalation in the cost of machineries and equipment's proposed to be

acquired by us at the actual time of purchase, resulting in increase in the project cost, which may result in cost overruns, and may affect our profitability. For further details read section “OBJECTS OF THE ISSUE” beginning on page no. 71 of the Draft Red Herring Prospectus

25. We face foreign exchange risk, which may negatively affect our business, financial condition and results of operations.

We export our products to different countries like Dubai, Oman, Jorden, South Africa, Vietnam etc. and payment for these sales is received in foreign currency. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company’s results of operations. We are not involved in the hedging of foreign currency which would result in losses and gains resulting from translation of foreign currency denomination on our financials.

26. Conditions and restrictions imposed on us by the agreements governing our indebtedness could adversely affect our ability to operate our business.

Our financing agreements include conditions and restrictive covenants that require us to obtain consents from respective lenders prior to carrying out specified activities and entering into certain transactions. Our lenders require us to obtain their prior approval for certain actions, which, amongst other things, restrict our ability to undertake various actions including incur additional debt, declare dividends, amend our constitutional documents, change the ownership or control and management of our business. We cannot assure you that we will be able to obtain approvals to undertake any of these activities as and when required or comply with such covenants or other covenants in the future.

Further, these debt obligations are typically secured by a combination of security interests over our assets and hypothecation of movables and future receivables. The security allows our lenders to inter alia sell the relevant assets in the event of our default.

Further, if we incur more debt or if there is an increase in the applicable interest rates for our existing debt, our interest payment obligations will increase, and we may become subject to additional conditions from our lenders, including additional restrictions on the operation of our business. The financing agreements that we are party to, or which we may enter into in the future, may be unilaterally terminated by our lenders or our lenders could decline to lend to us under such agreements. Further, we cannot assure you that we will be able to raise additional financing on favourable terms, or at all. Any failure in the future to obtain necessary financing could result in a cash flow mismatch. Any of these factors could have an adverse effect on our business, financial condition, our cash flows and results of operations.

27. Our manufacturing activities are dependent upon availability of skilled and unskilled labour.

We have made arrangement of labour requirements at our all manufacturing facilities through our on-roll employees, wherever required by our Company. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Though our business has not experienced any disruptions due to non-availability of labour or any disputes with them in past, we cannot assure you the same in future which may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. Any high attrition or competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects. For further details about business of our Company, please refer chapter titled “BUSINESS OVERVIEW” beginning on page no. 90 of this Draft Red Herring Prospectus.

28. Excessive dependence on any Key Managerial Personnel for the project for which the issue is being made.

Excessive dependence on any key managerial personnel for a project means that the success or progress of the project relies heavily on the contributions, decisions, or presence of a particular individual or a small group of individuals. This can be problematic for several reasons like: if limited decision making and reduce flexibility more dependency on the KMP for regular nature financial decisions etc.

29. Our Promoter, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them

and benefits deriving from their shareholding in our Company. For further details, please refer to the chapters titled “BUSINESS OVERVIEW” and “PROMOTER AND PROMOTER GROUP” beginning on page no. 90 and 138 respectively and the chapter titled “RESTATED FINANCIAL STATEMENTS” beginning on page no. 153 of this Draft Red Herring Prospectus.

If the transactions are executed not on Arms’ Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company without Promoters, Directors during last years, please refer to the Chapter titled “RESTATED FINANCIAL STATEMENTS” beginning on page no. 153 this Draft Red Herring Prospectus.

31. Our Company has in the past entered into related party transactions and may continue to do so in the future and we cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. And will not have an adverse effect on our financial conditions and result of operations.

Our Company has entered into various transactions with related parties. While our Company believes that all such transactions have been conducted on an arm’s length basis and contain commercially reasonable terms, there can be no assurance that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties.

It is likely that our Company may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transaction, individually or in the aggregate, will always be in the best interests of our Company and/or that it will not have an adverse effect on our business and results of operations.

32. Strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees/workmen in future could adversely affect our business and results of operations.

Our Company has total 48 employees as at 31st December, 2023, with an increase in our operation capacities or execution of any expansion projects in future, we expect increase in such number of employees and labours. We are subject to a broad range of safety, health and environmental laws and various labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, employee exposure to hazardous substances and other aspects of our operations. Compliance with, and changes in these laws may increase our compliance costs and as such adversely affect our results of operations and financial condition.

34. Our management has discretion in how it may use the proceeds of the Offer. Any variation in the utilisation of our Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.

Our use of the proceeds of the offer is at the discretion of the management of our Company. Meet Incremental Working Capital Requirement; and (iii) General Corporate Purposes. However, we have not entered into any definitive agreements and do not have any definite and specific commitments towards the aforementioned purposes for which our Company intends to use the Net Proceeds. Further, the Net Proceeds are intended to be utilized by the Company only and none of the members of our Promoter Group or Group Companies will receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds would require Shareholders' approval and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business. In the event that there is such a change in the objects of the Offer, our Promoters shall provide an exit offer to dissenting shareholders as provided for in the Companies Act, 2013 and in terms of the conditions and manner prescribed under the SEBI ICDR Regulations.

35. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed use of issue proceeds is ₹ [●] Lakhs as detailed in the section titled "OBJECTS OF THE ISSUE" on page no. 71 of this Draft Red Herring Prospectus. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the commencement of our new plant. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

36. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

We have estimated fund raising to the extent of ₹ [●] Lakh to finance the 'OBJECTS OF THE ISSUE' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. As on September 30th, 2023, our working capital stood at ₹ 5,048.14 Lakhs from ₹ 2,402.68 Lakhs as on March 31st, 2023. Our growing scale and expansion, if any, may result in increase in the quantum of current assets, which will increase our working capital requirements. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at

all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his / her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

4. More than 60.00% of our Revenue is derived from business in India for period ended September 30th, 2023 and a decrease in economic growth in India could cause our business to suffer.

At present, we derive more than 60.00% of our revenue from operations in India ended September 30th, 2023 and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Along with this, the area under its production also increased from 196 million hectares in 2019 to 201 million hectares in 2020. With the increase in production, trade is also encouraged around the world. According to USDA, the global trade shipments of corn amounted to over 181 million metric tons in the 2021/2022 trade year. Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20/- to ₹ 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22/- in the above example. The Company in consultation with the BRLM and Co-LM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22/-. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

INTRODUCTION

ECONOMIC OUTLOOK

Global real GDP is forecasted to grow by 2.9 percent in 2023, down from 3.3 percent in 2022. We expect further slowing to 2.5 percent in 2024. Economic growth is weighed down by still high inflation and continued monetary policy tightening. Looking ahead, we expect relatively subdued economic growth over the short-term. Growth forecasts for 2024 are generally strongest in emerging Asian economies, and weakest in Europe and the US.

Rapid monetary policy tightening over the last year or so weakened global housing markets, slowed bank lending, and pushed the industrial sector close to recession. However, those areas of weakness have been more than offset by persistent strength in household demand for services, which propped up local labor markets. Strong consumer spending and the fading impact of shocks of recent years have been difficult to assess, leading to ongoing forecast revisions. Nonetheless, recent data point to moderation of the positive trends, leading to slower global growth in 2024 and beyond.

OUR INDUSTRY OUTLOOK

The corn grit industry plays a significant role in the global food market, providing a versatile and essential ingredient used in various food products. Corn grits, also known as cornmeal or polenta, are coarsely ground corn kernels used as a primary ingredient in traditional dishes, snacks, and processed food products. This market analysis aims to provide an overview of the corn grit industry, including its key players, market size, trends, growth drivers, challenges, and future prospects.

The Maize Market size is expected to grow from USD 139.42 billion in 2023 to USD 161.70 billion by 2028, at a CAGR of 3.01% during the forecast period (2023-2028).

- Maize is a cereal grain, also known as corn that is rich in antioxidants like phenols and phytosterols. It is one of the leaders in terms of the production of cereal crops. Most of the maize produced in the world is used for feed and other purposes; only a small amount is used by people for consumption. It can be consumed only after processing into different food items such as popcorn, flour, tortillas, cornflakes, corn germ oil, etc. Maize products are also used in supplementary nutritional programs to feed malnourished children and improve their health.
- The growing meat industry is creating demand for more cereals, especially maize and soybean, as both are highly nutritious in terms of protein used for feeding livestock. It is very importantly used in the production of ethanol. The gaining importance of biofuel usage is encouraging the growth of the maize market.
- Corn is the primary US feed grain, accounting for more than 95% of the total feed grain production and use. It is cultivated on nearly 190 million hectares in about 165 countries with wide diversity and management practices. It accounts for 39% of global grain production, primarily used for livestock and feed purposes. It is also widely used for industrial purposes, including ethanol production. While the number of field farms for corn has declined in recent years, the acreage per corn farm has increased.

MAIZE MARKET TRENDS (GLOBAL)

Increase in Demand for Animal-based Protein Sources

Maize is one of the key ingredients of almost every type of compound feed for animal types, such as ruminants, poultry swine, and aquaculture. So, to cater to the increased demand for feed rations, maize is widely used. This has increased production on a global scale. For instance, according to FAO, global maize production increased from 1.14 billion ton to 1.16 billion ton in 2020. Along with this, the area under its production also increased from 196 million hectares in 2019 to 201 million hectares in 2020. With the increase in production, trade is also encouraged around the world. According to USDA, the global trade shipments of corn amounted to over 181 million metric tons in the 2021/2022 trade year. Hence, the increasing demand for animal-based protein sources is likely to drive the production and trade market for maize at a global level.

INDIAN OUTLOOK

The maize industry in India plays a significant role in the country's agricultural sector. Maize, also known as corn, is one of the major cereal crops grown in India and is cultivated across various states. Here is an overview of the maize industry in India:

Production: Among the maize growing countries, India ranks 4th in area and 7th in production, representing around 4% of the world's maize area and 2% of total production. During 2018-19 in India, the maize area has reached 9.2 million ha (DACNET, 2020). During 1950-51 India used to produce 1.73 million MT maize, which has increased to 27.8 million MT by 2018-19, recording close to 16 times increase in production. The average productivity during the period has increased by 5.42 times from 547 kg/ha to 2965 kg/ha, while the area increased nearly three times. Though the productivity in India is almost half of the world, the average per day productivity of Indian maize is at par with many lead maize producing countries.

Varieties: Several maize varieties are grown in India, including hybrid and composite varieties. Hybrid maize varieties are popular due to their high yield potential and adaptability to different agro-climatic conditions. Different varieties are cultivated based on their usage, such as grain maize for human consumption, sweet corn for direct consumption, and fodder maize for livestock feed.

Applications: Maize has diverse applications across various industries in India. The major usage of maize is as animal feed, where it serves as a key ingredient in the poultry, dairy, and livestock sectors. It is also used for starch production, producing various food products like corn flakes, corn flour, corn oil, and snacks. Additionally, maize is used for the production of industrial products like ethanol, adhesives, and bioplastics. Bulk of the maize production in India, approximately 47%, is used as poultry feed. Of the rest of the produce, 13% is used as livestock feed and food purpose each, 12% for industrial purposes, 14% in starch industry, 7% as processed food, and 6% for export and other purposes.

Export and Import: India exports a significant quantity of maize to countries like Bangladesh, Vietnam, Malaysia, Nepal, and the United Arab Emirates. The export demand is driven by factors such as competitive prices, good quality, and increasing global consumption of maize-based products. However, India also imports maize in smaller quantities to meet specific requirements. The country has exported 3,453,680.58 MT of maize to the world for the worth of Rs. 8,987.13 crores/ 1,116.17 USD Millions in 2022-23.

Challenges: The maize industry in India faces several challenges. One of the primary concerns is the fluctuation in prices due to factors like supply-demand dynamics, weather conditions, and international market trends. Pests and diseases, including stem borers and fungal infections, can also affect maize production. Additionally, lack of proper storage and infrastructure facilities pose challenges for farmers, leading to post-harvest losses.

Government Initiatives: The Indian government has taken various initiatives to support the maize industry. It promotes the adoption of improved farming practices, provides subsidies on seeds and fertilizers, and encourages research and

development in maize cultivation. The government also focuses on increasing investment in infrastructure, storage facilities, and processing units to minimize post-harvest losses and add value to the maize industry.

Overall, the maize industry in India is a vital component of the agricultural sector. With increasing demand for maize-based products domestically and globally, efforts to enhance productivity, address challenges, and promote sustainable practices are essential for the growth and development of this industry.

RAW MATERIAL

Our Company thrives on the versatility of corn as our primary raw material. Advanced processing techniques transform corn into a diverse product line, featuring maize flakes, corn flour, corn grits and broken maize. Our precision-driven manufacturing ensures good quality, with strict adherence to safety standards.

The company’s product range includes nutrient-packed maize flakes, versatile corn flour, essential corn grits and sustainable broken maize used primarily in animal feed. Quality control is paramount, exceeding industry standards, and fostering trust among our customers. With a robust supply chain, sustainable sourcing, and innovation, we maintain a competitive edge, meeting evolving market needs.

We purchase raw material i.e. Maize through two main sources. Both are as explained below.

A) Directly from farmer:

Since TBICL has been in the business for last 25 years or so, we are quite well-known to all the maize farmers in our catchment area. Farmers absolutely trust TBICL when it comes to accurate weigh-ins of their produce, fare rates and confirmed payments. Due to this, many farmers elect to bring their produce directly to our factories. Farmers with bigger land portions can afford to hire an entire truck for loading while many smaller farmers combine their produce and load the trucks.

When the truck arrives at the factory, our procurement team obtains samples from random bags and hands over the Quality Control team. Quality Control (QC) checks for parameters like Moisture, Fungus, Size, Colour, Foreign materials and other irregularities to grade the raw material. This information is passed over to the procurement team which then decides on the purchase rates based on the quality, availability and market rates. Rates are conveyed to the farmer who then decides whether to unload the maize.

After unloading, QC checks are again carried out on more samples to confirm that the rest of the raw material matches with the earlier sampling quality. This is the point at which Procurement team hands over purchase details to the Accounts team.

B) Through APMCs:

Sometimes farmers decide to bring their maize to the APMCs for auctioning. There are many traders who purchase from farmers, store the produce and bring to APMCs when rates are more amenable. TBICL Procurement team daily

participates in APMC auctions. Here the team checks raw material sample visually and physically. Based on their years of experience, our team is reasonably sure of the maize grade after their checks. The team decides the rates and participates in the auction process.

Raw material bought in the auction is delivered to our factories by the farmers / traders who has loaded the truck. After unloading, QC checks for parameters like Moisture, Fungus, Size, Colour, Foreign materials and other irregularities to grade the raw material are carried out on more samples to confirm that the rest of the raw material matches with the earlier sampling quality. This is the point at which Procurement team finalises rates and hands over purchase details to the Accounts team.

Both purchase courses converge here where in the Accounts team completes the payment process with the farmers/traders. Simultaneously, our Warehousing team accepts the maize delivery, grades, date stamps and stacks the raw material in selected godowns.

MANUFACTURING PROCESS OF OUR PRODUCTS

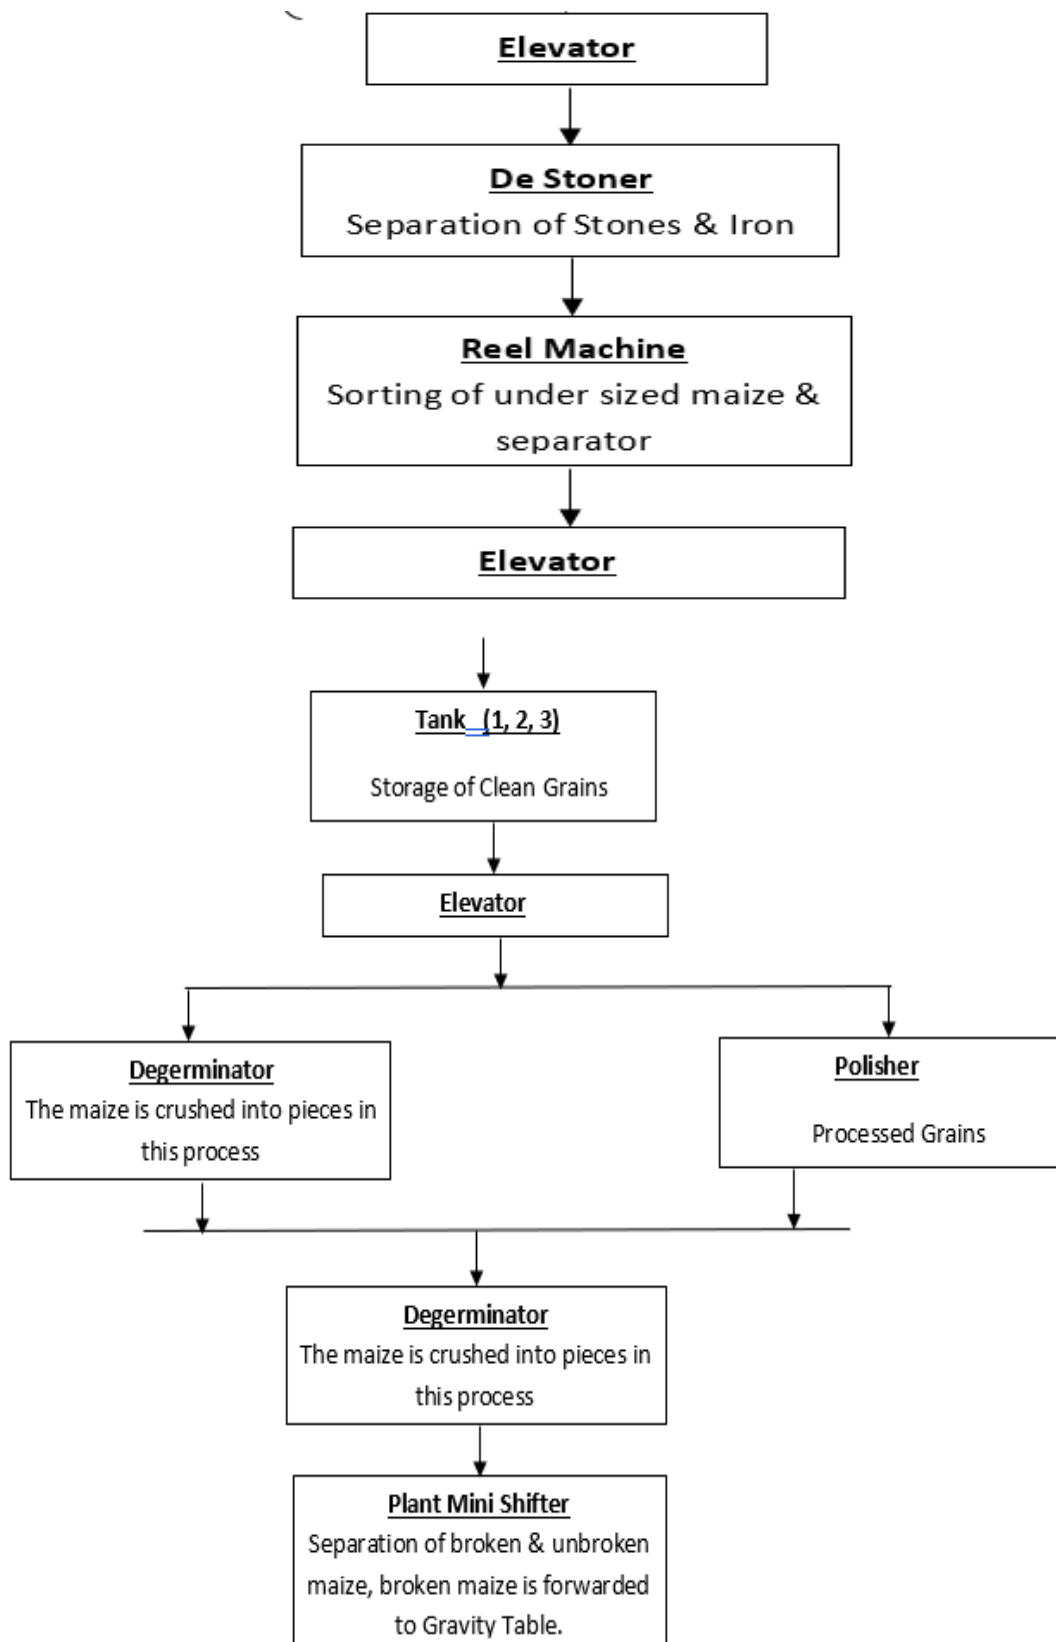

1. CORN GRITS

Throughout our plant, Raw material is transported to the machinery at various stages through conveyor belts. Also, since dry milling of corn heavily uses the natural benefits of gravity, elevators are used at various stages to transport the material to higher levels. You will also find many storage tanks along with the machinery in the plant which are used to store similar size separated grains or goods in process at various stages.

The first objective is to ensure that all the waste and hazardous material is separated from the grain, is collected separately and disposed so that it doesn't mix with grain again. To this effect, Drum Sieves are used to separate coarse impurities, such as straw particles, string, paper, pieces of wood, leaves etc. Similarly, Separator Machine efficiently removes both large of coarse material, and fine impurities from the grain being cleaned. Additionally, Destoner Machines remove the heavier impurities materials mixed stones that are the same as the grain size. The Maize Grader Machines and Reel machines work on differentiating maize according to the size of maize by sorting and separating under sized grain.

The grain is now crushed into pieces by the Degerminator Machine by scrubbing the bran skin from the maize Kernel to dislodge the germ from its cavity, with the minimum reduction in size of the broken fragments. Depending upon the grade of the final product required, Polishers are used for polishing the grain particles. Plan sifter then classify the material after grinding, so that materials of different particle levels are sent for further grinding and crushing, and the flour that has reached the particle size requirements of the finished product is collected for final processing. The crushed maize is classified now in different sizes using the Gravity Table that sorts materials with same grain size, but with different specific weight. Magnetic Destoners are employed at various stages for enhancing the product purity by removing mud balls / ferrous stones and any type of ferrous Contamination. Milling Roll body consistently and safely grinds broken maize according to maize size. After another round of operations through Plant sifter, the final product of Corn Grits are sent for further packing and stuffing.

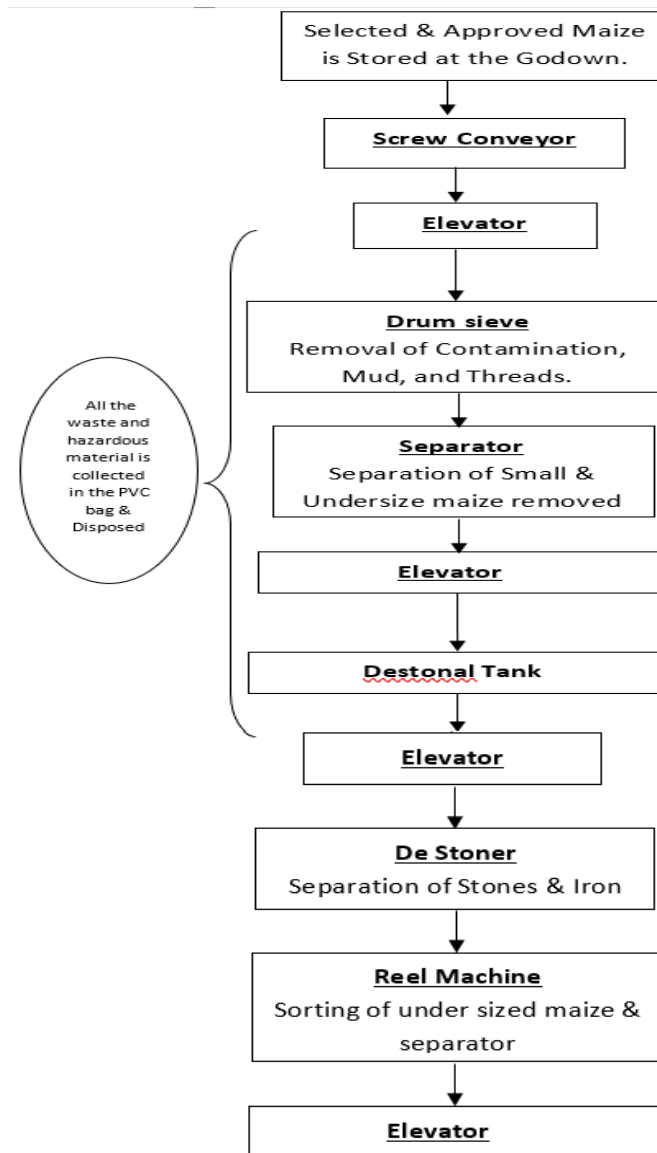

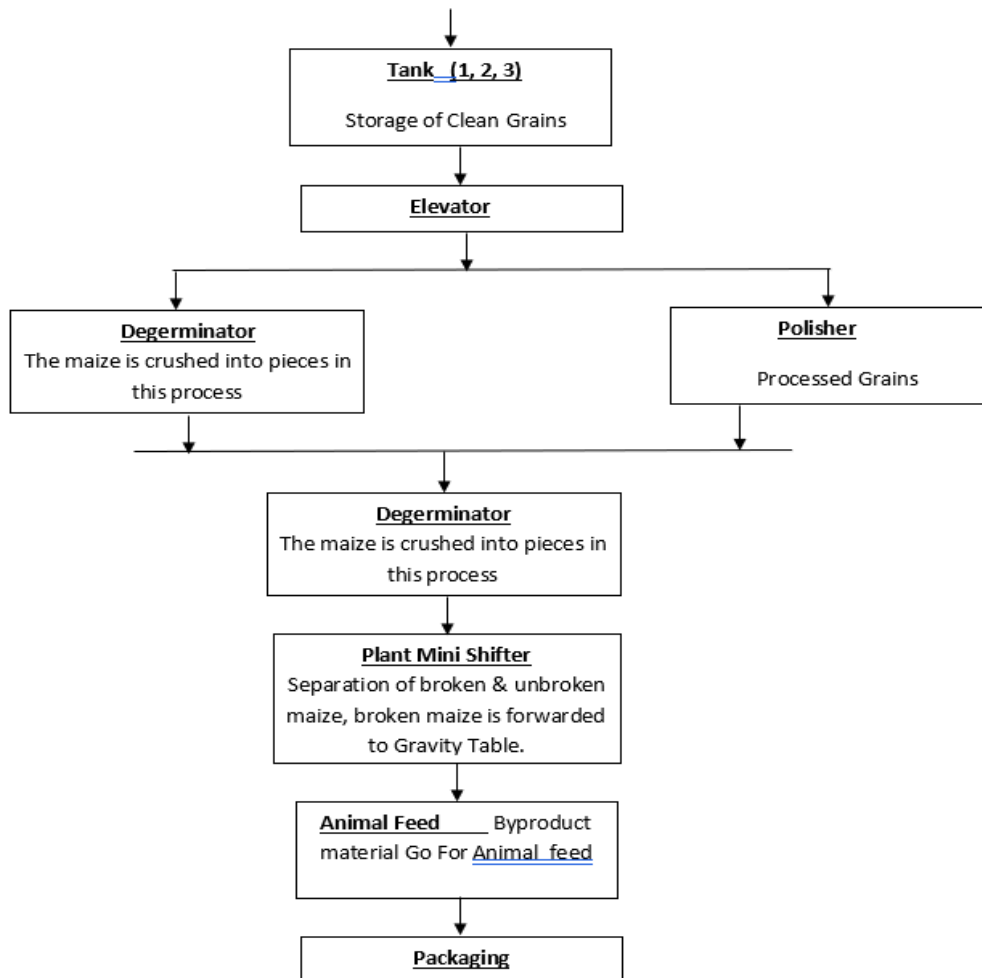

2. CORN BRAN

Throughout our plant, Raw material is transported to the machinery at various stages through conveyor belts. Also, since dry milling of corn heavily uses the natural benefits of gravity, elevators are used at various stages to transport the material to higher levels. You will also find many storage tanks along with the machinery in the plant which are used to store similar size separated grains or goods in process at various stages. The first objective is to ensure that all the waste and hazardous material is separated from the grain, is collected separately and disposed so that it doesn't mix with grain again. To this effect, Drum Sieves are used to separate coarse impurities, such as straw particles, string, paper, pieces of wood, leaves etc. Similarly, Separator Machine efficiently removes both large of coarse material, and fine impurities from the grain being cleaned. Additionally, Destoner Machines remove the heavier impurities materials mixed stones that are the same as the grain size. The Maize Grader Machines and Reel machines work on differentiating maize according to the size of maize by sorting and separating under sized grain. The grain is now crushed into pieces by the Degerminator Machine by scrubbing the bran skin from the maize Kernel to dislodge the germ from its cavity, with the minimum reduction in size of the broken fragments. Depending upon the grade of the final product required, Polishers are used for polishing the grain particles. Plan sifter then classify the material after grinding, so that materials of different particle levels are sent for further grinding and crushing, and the flour that has reached the particle size requirements of the finished product is collected for final processing. The byproduct generated at this stage in form of finer material is the corn bran that is used as a core ingredient by many animal feed companies.

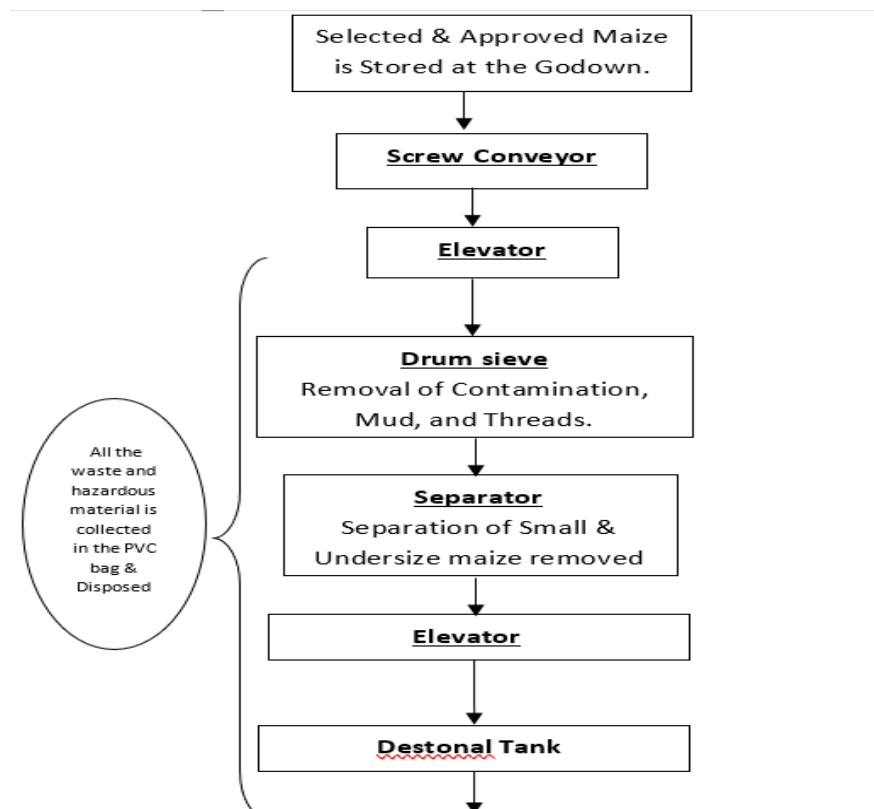

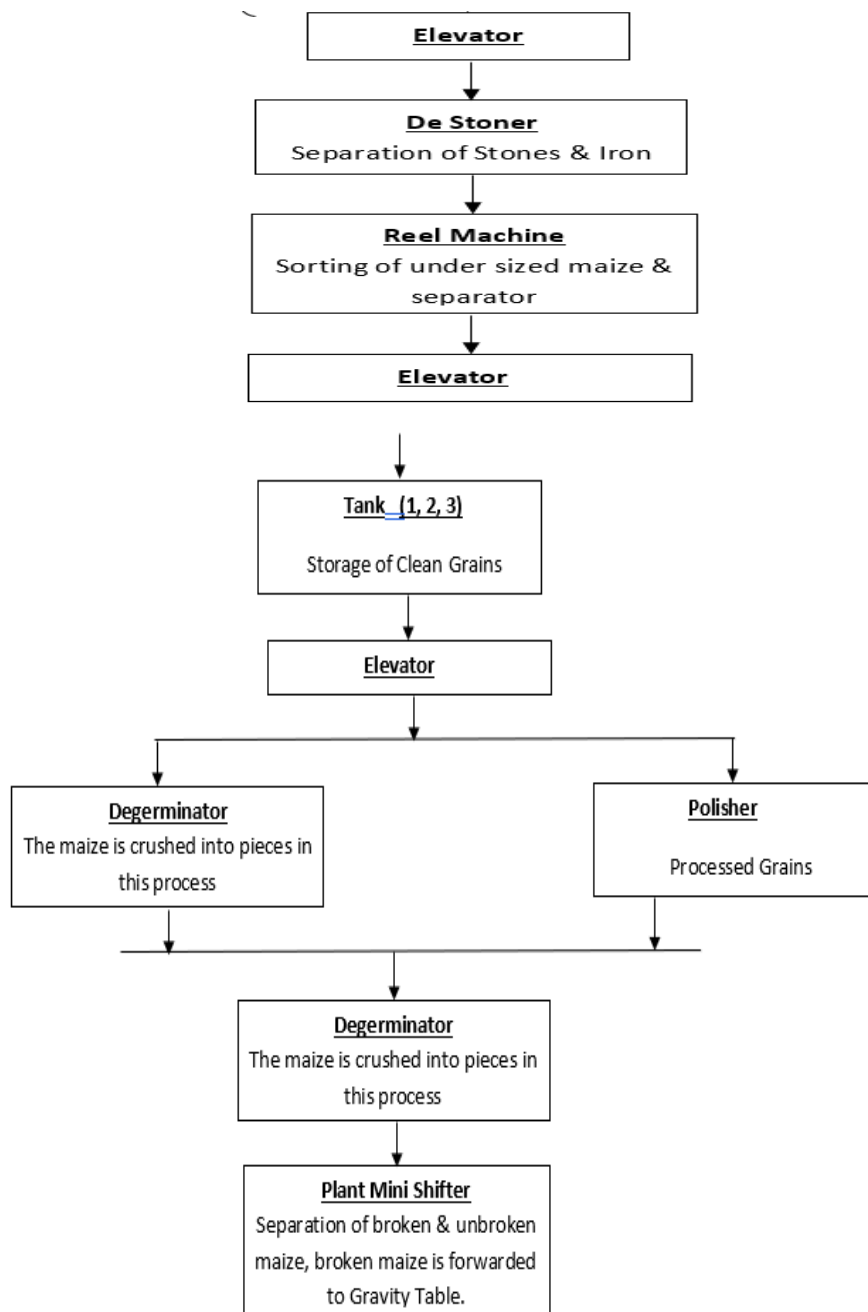

3. BROKEN MAIZE

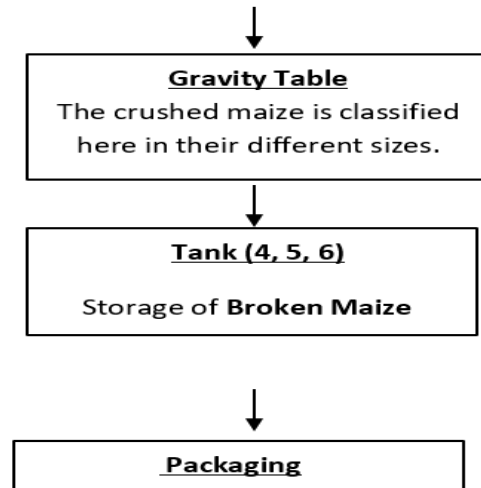

Throughout our plant, Raw material is transported to the machinery at various stages through conveyor belts. The crushed maize is classified now in different sizes using the Gravity Table that sorts materials with same grain size, but with different specific weight. Magnetic Destoners are employed at various stages for enhancing the product purity by removing mud balls / ferrous stones and any type of ferrous Contamination. Many of our customers require the slightly bigger in size and coarse gran material generated at this stage which is used as the broken maize.

4. PROCESSED INDIAN YELLOW MAIZE

6. CORN FLAKES

Throughout our plant, Raw material is transported to the machinery at various stages through conveyor belts. Also, since dry milling of corn heavily uses the natural benefits of gravity, elevators are used at various stages to transport the material to higher levels. Additionally, Destoner Machines remove the heavier impurities materials mixed stones that are the same as the grain size. The Maize Grader Machines and Reel machines work on differentiating maize according to the size of maize by sorting and separating under sized grain.

The clean maize obtained at this stage is now polished using Polishers that are used for polishing the grain particles. Gyro machines are now used to separate the grains according to the size required for the particular batch of final product. The polished maize is now transported to the Cookers where water and steam is induced for cooking the maize for the predefined time intervals. An additional physical check is very vital at this stage to ensure that the cooking process has generated the intended cooks level of the corn material.

Specific spiral conveyers are used now to transport the cooked maize to bring down the temperature of the product by cooling down. Flakers work on the cooked maize to bring intended shape to the flakes. Reel machines are used here to filter flakes based on their sizes. The flakes that are considered qualified for the particular batch are now sent through the dryers for drying and obtaining the required hardness and crunchiness. Dried Corn Flakes are further filtered and sent for packing and stuffing into the cartons as per the buyer requirements.

OUR COMPETITIVE STRENGTH

Our competitive strength at TBI lies in our unwavering commitment to delivering exceptional quality in corn grit, corn flex, and corn flour and other related products. With a state-of-the-art production facility, cutting-edge technology, and stringent quality control measures, we ensure that our offerings meet the highest standards. Our vertically integrated supply chain, from sourcing premium corn to the final product, allows us to maintain consistency, traceability, and cost-efficiency. Additionally, our team of dedicated experts continually innovates and adapts to market trends, ensuring that we stay ahead in providing versatile, top-notch corn-based solutions to our valued customers.

BUSINESS STRATEGY

The company's business strategy encompasses two primary focal points:

- 1. Establishing Strong Relationships:** The Company is dedicated to fostering robust connections with both its suppliers and customers. The commitment to this objective is unwavering, even if it entails short-term drawbacks. Notably, unlike prevalent practices in the industry where contracts are severed due to fluctuating raw material costs, the company, known as TBI, upholds its commitments to all contracts. Moreover, the company proactively communicates reduced prices to its customers, sharing the benefits of cost savings. This approach has garnered substantial goodwill, positioning TBI favorably among customers for new transactions. The company's rapport with its suppliers is marked by equitable dealings and mutual respect. Every entity involved in the supply chain, including farmers and traders, is treated fairly, compensated justly, and accorded respect. TBI's principled approach to business, though unconventional, has proven to be not only ethically commendable but also financially rewarding within the industry.
- 2. Resilience Against Commodity Price Fluctuations:** A meticulous study undertaken by the company unveiled a recurring challenge faced by corn mills in the industry – despite consistent demand and supply growth, several enterprises experienced closures. This was traced to a heavy emphasis on market speculation (teji-mandi) and cost-cutting efforts, especially in raw material storage. In a conscious departure from such approaches, TBI adopted a strategy of maintaining its stock in alignment with customer orders. While this incurs greater investment in inventory management, it also safeguards against panic-driven purchases during price escalations. The company's inventory practices ensure a steady availability of stock to navigate challenging periods. Additionally, TBI's strategic diversification across domestic and export markets mitigates the impact of market-specific downturns. Maintaining a year-round presence in various markets, bolstered by consistent small-scale purchases from markets across India, has provided TBI with a holistic understanding of market trends. This insight significantly contributes to enhancing profit margins.

These distinct business strategies, rooted in ethical integrity and prudent operational decisions, have positioned the company advantageously within its industry.

The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 01, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 01, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to Three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM and Co-LM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
